## Permit with introductory note

Pollution Prevention and Control (England & Wales) Regulations 2000

---

Little Weighton Cutting

Dispit Limited  
Great Gutter Lane  
Albion Lane  
Willerby  
HU10 6DP

Permit number  
LP3939BK

# Little Weighton Cutting

## Permit Number LP3939BK

### Introductory note

#### *This introductory note does not form a part of the permit*

The main features of the installation are as follows.

The site has been operational as a landfill since March 2001. The site will operate as an inert waste landfill site over the next ten years, depositing approximately 60,000 tonnes of waste per year. The estimated total void space is 600,000 cubic metres

The site is approximately 3.1 km in length, orientated North-West to South-East, and lies immediately south of the village of Little Weighton in the East Riding of Yorkshire. Some 1.25 km to the North-East is the village of Skidby, whilst to the South-East lies the village of Willerby.

The site is underlain by chalk of the Yorkshire Wolds escarpment that is up to 79m in thickness at the northern end of the Cutting and 49m at the south-eastern end. Groundwater levels below the site are shown to fluctuate between 25m in winter and 75 metres in summer.

In accordance with the Landfill Regulations 2002 the site will operate all future phases with an artificially established geological barrier that will not have permeability greater than the equivalent of 1m at  $1 \times 10^{-7}$  m/s. This artificially established geological barrier will extend the height of the waste up the quarry walls and will also be compacted so that it will not have permeability greater than the equivalent of 1m at  $1 \times 10^{-7}$  m/s.
