

Mixed recyclables collection service for businesses

reduce your waste
management **costs**

improve your **environmental
performance**

stay ahead of your competitors

Why recycle your commercial waste?

There are many reasons to recycle your waste and reduce the amount being sent to landfill. Legislation and taxation are often the major drivers but many companies are now required to improve their green credentials by customers further down their supply chain. Indeed, recycling and recovering value from waste not only protects the environment but can also generate a significant cost saving which is often underestimated.

Wastewise has launched a brand new mixed recyclables collection service to help your business beat the landfill tax hikes and prepare for a zero landfill future.

The service:

- Weekly collection of dry mixed recyclables from your premises
- Wide range of wheelie bins and containers to suit your business needs
- Recycling and recovery of your waste at a licensed waste treatment facility

The benefits:

- Reduced waste disposal costs
- Simpler and easier recycling to help reduce your carbon footprint
- Future proof your waste management costs
- Give you a green competitive advantage
- Recycled materials are turned into new products

What businesses might benefit?

- Shops
- Offices
- Supermarkets
- Schools
- Pubs, Restaurants & Hotels
- Hospitals
- Manufacturers
- Wholesalers
- Building services
- Any other business producing mixed recyclables

What can you put in the recyclables bin?

Our comprehensive service allows you to put a wide range of dry recyclable materials into the wheelie bin.

Yes please:

- Paper
- Cardboard
- Plastics
 - Bottles, containers, films, bags and rigid plastics
- Metals
 - Aluminium and steel cans, tins, foil and scrap metal
- Mixed glass

No thanks:

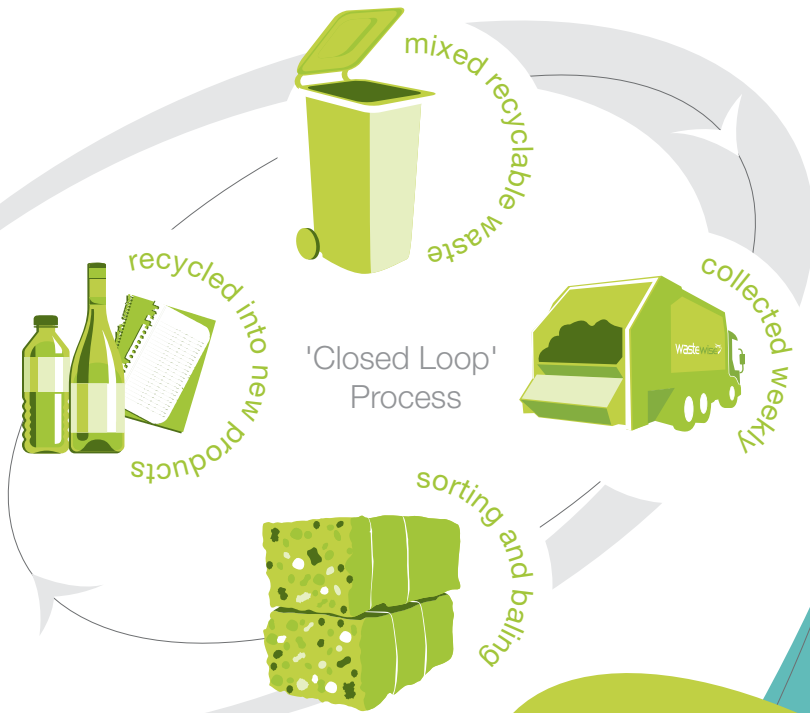

Please do not put any of these materials into your wheelie bin:

- Food waste
- Electrical goods
- Textiles
- Garden waste
- Building materials
- Wood and timber

What happens to your mixed recyclable waste?

Once we have collected your recyclables they are taken to our waste treatment facility where they are sorted. Each material is then bulked up into large bales before being sent to reprocessors for further treatment and recycling into new products.

Wastewise's mixed recyclables collection service has been developed with the support of:
