

# Welcome to Wastewise

Wastewise is a leading waste management, recycling and skip hire company based in Hull and East Yorkshire. With over 50 years' experience, we are committed to helping our customers improve their environmental performance whilst lowering costs.

We specialise in the collection, recycling and recovery of waste to help reduce greenhouse gas emissions and recover valuable raw materials. We pride ourselves on offering the most sustainable and cost effective solutions with unbeatable service levels.

Whether you are a local authority, business or homeowner, we can help.

## Zero to landfill

At Wastewise, we see waste as a valuable resource so we focus on reusing, recycling or recovering value from it rather than sending it to landfill. We are proud to offer our customers a zero waste to landfill solution in exchange for greener, safer and more economic alternatives.

We partner with other waste management companies to turn residual waste into RDF (Refuse Derived Fuel) which can generate electricity and heat. This eliminates landfill and the harm it does to our environment.

## Total waste management

From segregation and collection to recycling and recovery, Wastewise provides an efficient, reliable and responsive total waste management solution to suit customer requirements.

Where appropriate, we can also offer a dedicated on or off-site manager to coordinate and monitor the recycling and waste management needs of a large single or multi-site customer.

Our 'one-stop shop' solution is founded on a professional and friendly service. You can relax in the knowledge that you are doing your bit for the environment, achieving significant cost reductions and meeting the challenges of increasingly stringent legislation.

### - Free waste audit

As part of our service, Wastewise provides a free no-obligation waste audit from which we develop the most sustainable and cost effective solution to meet your needs.

## Bins & containers

Wastewise understands space is a premium for all businesses. Far from cluttering up your work environment, our bins and containers can actually save you space, money and give you added health and safety benefits.

We offer a full range of containers to suit your needs. From wheelie bins and skips to bulk containers, which we collect promptly and reliably at your convenience.

## Waste collection

Wastewise offers a comprehensive waste collection service to maximise recycling rates and deliver significant cost savings whilst maintaining the highest levels of customer service at all times. This includes separate collections for single stream recycling, dry mixed recycling and food waste recycling.

With Wastewise you can be sure your waste will be taken care of legally, responsibly and with minimal disruption to your business. Our customers have access to an efficient, reliable and responsive service using the latest transport and treatment technologies.

## Recycling & recovery

There are many reasons to consider recycling your waste. Legislation and taxation are often the major drivers but companies are now also required to improve their green credentials by customers further down their supply chain.

Wastewise strives to develop and promote ways to recycle and recover value from waste and reduce the amount sent to landfill. Our innovative approach enables us to achieve an overall recycling rate of over 90%. The residual waste which cannot be recycled or recovered is used to generate electricity and heat.

We provide comprehensive, cost-effective and sustainable solutions for an increasing range of materials including paper, cardboard, plastics, metals, glass, wood, organic waste (incl. food and green waste), construction and demolition waste.

## Skip hire

Wastewise provides a professional and reliable skip hire service for construction and demolition projects or sites producing large quantities of heavy and bulky waste including household clearances and renovations.

Our skips come in three sizes - 8yd<sup>3</sup>, 12yd<sup>3</sup> and 14yd<sup>3</sup>. The 8yd<sup>3</sup> skip is suitable for heavier waste such as soil and construction waste, whereas the 12yd<sup>3</sup> and 14yd<sup>3</sup> skips are suitable for lighter and bulkier waste.

You can hire our skips for as long or as short a time as you like. We take care of all waste documentation, skip permits, lights and cones for you.

## Recycled aggregates & landscaping products

We supply a range of high quality recycled composts, mulches, top soils and aggregates for use in a variety of professional and domestic applications.

All of our landscaping products are rich in organic matter with no chemical additives and are fully certified to industry standards.
